Project 5 - Calculator

tasks	details	estimated time (hour)	real time (hour)	date
see calculator & analysis it	seeing how to work calculator	4	2	1402/02/14
	analysis work way			
	thinking about its logic			
Designing the basic structure of the calculator	use bootstrap code	3	2	1402/02/16
	use html & css code			
	design bottoms & location	3	2.5	1402/02/17
	layout			
Designing final calculator	type contents of buttons	3	2.5	1402/02/18
	adjust distanse			
	adjust colors	3	4	1402/02/19
	making shape			
Perform mathematical operations	using javascript code	3	3	1402/02/20
	using operators code	3	3	1402/02/21
	perform logical operation	3	3	1402/02/23
	perform logical operation & Debugging	—	3.5	1402/02/24
	perform logical operation & Debugging	—	3.5	1402/02/25
	perform logical operation & Debugging	—	4.5	1402/02/26

total estimated time	25
total real time	33.5
